

Output of ToxinPred 2.0 Prediction Module

The results are displayed in a tabular format. The provided table contains a sequence header, predicted scores (ML Score) generated from the selected machine learning model along with the prediction of the query sequence. For the Hybrid approach, the prediction is based on a combination of scores generated from machine learning (RF), MERCI, and BLAST as Hybrid Score. The results of the Hybrid approach show the sequence header, ML Score, MERCI score, BLAST Score, Hybrid Score and prediction of the query sequence. Thanks for using our server ToxinPred2 for predicting toxic proteins, your **Job ID: 83390** for reference. In case you need more information, click on [Help](#).
